

RODA® Pur, RODA® Pure and RODA® Fix

Aqueous high-gloss PUDs for top coats

» Shiny fashion articles with deep transparency

TFL – Great chemicals. Excellent advice.

RODA® Pur, RODA® Pure and RODA® Fix

Easy application for high-gloss finishes

**New water based top coats which can be used alone or as a glossy component
to achieve the most fashionable and demanding high gloss articles**

- Extreme gloss
- Profound transparency
- Extremely tough yet elegant and smooth
- Less post-hardening
- Medium hard with elegant and smooth surface
- High water resistance
- Excellent light fastness
- Unmatched flow and leveling properties

 **Enjoy high gloss and fastness properties at lowest possible VOC emission!**

**Make your leather shine
and stand out**

- RODA® Pur 5805/N3 is recommended for all types of high gloss shoe upper and bag leather
- Top coats with RODA® Pur 5805/N3 are distinguished by high transparency, excellent leveling and good flexing properties
- RODA® Fix 5090 and RODA® Pure Finish 5090 are used in soft high gloss finishes to create patent naplak effects after milling
- RODA® Pure Finish 5090 is made of over 50% renewable bio raw materials. Another step towards applied sustainability...

**Discover the difference to solvent
based patent leather!**
